Abstract of JP4191755

PURPOSE: To facilitate the changing operation and make a recording device easy to see and convenient for use by providing such a constitution as not only confirming the input state of job mode by a confirmation display means, and conducting the change or cancellation during confirming the function set.

CONSTITUTION: When a set confirming button 351 is pushed, the button display of copy mode is displayed on a LCD screen 36, and by pushing this display button, the function is released in the case of a function having no parameter (Pm). In the case of a function having Pm, a pop-up window (Pw) is displayed by pushing the display button, and the Pm can be changed by pushing a Pm button. When an end button 230 is pushed without pushing the Pm button, the Pw is closed, and when the button 351 is again pushed without pushing the function button on the screen 36 during the button display of copy mode by pushing the button 351, the display is released, a set confirmation lamp 371 is extinguished, and the screen is returned to a basic screen. When a copy start button is pushed at this time, the copy operation is conducted. Thus, the change operation is facilitated, and the device is made easy to see even by a small confirmation display means, and improved in convenience for use.
